

NORSEMAN STRUCTURES IS RELENTLESS IN FINDING THE RIGHT SOLUTION

Utility Product Line QC-Series

MODEL	QC180	QC250	QC300	QC380	QC420			
Bldg Width	18' (5.4m)	25' (7.6m)	30' (9.1m)	38' (11.5m)	42' (12.8m)			
Peak Height*	14' (4.2m)	17' (5.1m)	19' (5.7m)	19' (5.7m)	21' (6.4m)			

TRUSS SPACING

Truss spacing is available in 3', 4' & 5' (0.9m, 1.2m & 1.5m) widths. Certain building widths may not be available in all truss spacing configurations.

QC-SERIES 18' - 42' WIDTHS (5.4m - 12.8m)

Cost effective and customizable storage solutions.

The QC-Series buildings are available in a wide variety of clear-span widths and are designed for light duty storage. The clear-span design (no interior columns) allows for increased storage space and easy maneuverability.

Depending on the scope of the project, a QC-Series building can usually be installed in less time than a conventional structure getting you up and running sooner.

- Available with a base rail option allowing buildings to be anchored directly to the ground for low foundation costs and quick construction time.
- Some models can be customized to include wall heights up to 6' (1.8m) for increased clearance.
- Available with fabric or Galvalume (steel) end walls.
- Cost effective, quick installation and easily relocated.

Fiercely Reliable™

Utility Product Line QC-Series

STEEL FRAMEWORK

Norseman's QC-Series buildings use high quality, in-line galvanized steel tube to provide our customers with a product unmatched in the industry. Known for its superior corrosion protection, your QC-Series steel goes through a three step process starting with a layer of 99.99% pure zinc being applied to the surface. This layer is then topped with a conversion coating followed by a clear organic topcoat that seals the surface with a smooth finish. This triple layer provides a much higher corrosion protection coating than the traditional single layer of zinc. The interior of the steel tube is then painted with zinc enriched paint.

FABRIC COVERS

Our standard 12oz/yd², 23mil high performance cover fabric is manufactured specifically for your building and is available in a variety of colors. Fire retardant (FR) fabric is also available when required by your local building code. You can choose from either a highly translucent cover material or blackout fabric which is also available when natural light is not required.

Standard Colors

Fire Retardant (FR) Colors

FOUNDATIONS

Foundation options are varied and may include, but are not limited to:

- Concrete piles
- Precast concrete walls
- Precast concrete blocks
- Concrete pad
- Ground anchors
- Ground stakes
- Flighted anchor system
- Shipping containers

ACCESSORIES

- Heating
- Flooring
- Passive ventilation
- Ridge vents
- Electrical
- Reflective insulation
- Air exchange units
- Electric louvers or fans
- Personnel doors
- Fire exit doors
- Emergency lighting
- Metal clad end walls
- Gas detection systems
- Shelving
- Overhead doors
- Door canopies

WHY NORSEMAN STRUCTURES

In addition to manufacturing buildings, Norseman Structures provides project management, technical representative services and complete building installations. Our team of experts will work closely with you to design a building solution that will work for you and your business.
